July 1 SPDX

Next Meeting, 7/15, 11EDT.
Back to normal agenda and dial in.
Agenda and dial in info will be issued in advance.

Attendance
Bill Schineller, Black Duck
Dennis Clark, NexB
Esteban Rockett, Motorola
Jack Manceck TI
Jeff Luszcz, Palamida
Mark Gisi, Wind River
Marshall Clow, Qualcomm
Martin Michlmayr, HP
Michael Herzog, NexB
Tom Incorvia Micro Focus

Trademark
We are moving ahead with SPDX and Software Package Data
Exchange. We need to start using the TM in all externally facing
materials.
*Rockett will issue a memo .

Messaging
PhilO posted V1.1 of the standard presentation on the wiki. Only
change is adding TMs. Also mentioned his SPDX article in Dr. Dobbs.
Recruiting SPDX participation at IBM, Apache. Martin has also
generated interest from Apache and Mozilla as well.

Website
Martin solicited feedback on new FOSSBazaar (Linux Foundation-like)
website. He's rearranged and consolidated the SPDX section.
Martin will be expanding SPDX website prior to LinuxCon. Phil and Kate
are in process of proposing an SPDX logo.

OSCON
PhilO, JeffL, and MarkG will man FOSSBazaar/SPDX stand in HP booth.
We'll have the FOSSBazaar website up and SPDX slides.
*Jeff will create a sign with relevant URLs and QR Codes (for scanning
with phone camera). Jeff you should probably coordinate with Lynn
Abbott.
LinuxCon & SPDX
Kate will be speaking and PhilO has scheduled a Birds of a Feather

session. We are hoping to turn that into a working SPDX meeting, if enough participants attend.

EXAMPLE FOR APPENDIX II
Criteria:
    Small, multi-license
    Nothing that exposes a project's "dirty laundry" (e.g. licensing incompatibility)
    Relatively general and well known
    Ideally uses every field
zlib was agreed as a candidate the met the criteria. It has 228 files, so there was concern that it would be long for a printed appendix. It was agreed that some abbreviation would be OK for the Appendix, but that the full example should be available (with others) on the SPDX website. Abbreviation, for example, might not provide an exhaustive list of files with no licenses.
*JeffL has already done some work with a zlib example for SPDX and will update to the latest in time for review in advance of 7/15 meeting.
*Bill will provide Jeff with updated RDF specification (targeting this weekend).
