Meeting: June 24 - 8:00 PDT/10:00CDT/16:00 GMT

Agenda

- attendance
 - Mark Gisi (Windriver)
 - Tom Incorvia (Micro Focus)
 - Daniel German (U of Vic.)
 - Phil Odence (Blackduck)
 - Phil Robb (HP)
 - Bill Schineller (Blackduck)
 - Kate Stewart (Freescale)
- approval of prior minutes (2010/06/17 see below)
 - no issues raised.
- use of SPDX ™ while pursing trademark filing Rockett
 - AI: Rocket to mail out summary to package-facts list of guidelines we should all be following when using SPDX to preserve trademark.
- meeting schedule until August:

June 24 - technical - Kate to host

July 1 - marketing - Phil to host *** Phil to mail **out different dial in num**ber.

July 15 - regular - technical & marketing *** use Phil's number for this one too.

July 22 - technical - Kate to host

July 29 - regular - technical & marketing

- resume working through open issues from last week's agenda on the document in https://fossbazaar.org/wiki/spdx/specification
- 3 continued...
- 3.2.7 Declared Copyright Holder of package
- 3.2.8 Declared Copyright Date of package
 - rewrite to match 5.2.4? Kim? Kate?
 - extended characters permitted?
- Bill agrees with combining fields like 5.2.4.
- Based on analysis work done in research, Daniel G. recommends we just make this a freeform field to capture whatever copyright text is found, and refine it subsequent versions.
- **resolution**: version 1 will ust have Copyright field, with freeform text. Kate to add to next draft.

- 3.2.9 Pithy Description field

- make optional.
- mail list indicated 2 fields, short desc and description is direction. concerns? coordinate with FOSDEM approach?

http://fosdem.org/2010/schedule/events/dist_pkg_desc (align with freshmeat API?)

- need owner to code up spec for these two fields based on email threads and RDF notation- Jeff?
- discussed this, and felt best approach was to align with RDF in example by Garv.

(with short and long descriptions present.

- resolut**ion: Kate t**o add to next draft following syntax proposed in example. To be scrubbed in

next review cycle.

4 License text

- 4.2.2 Extracted Text.
 - need to clean up syntax to align with RDF. who?
- resolution: **Kate will** take first pass; Bill S. will review next draft and make any necessary corrections.

5 File Specific information:

- 5.1 One entry for every file in package
 - do we have counter proposal or go with this for version 1?
- resolution: for **version 1** we go with one entry for every file. This will be revisited in next version.

- 5.2.1 Full File Name

- **anyon**e remember why we wouldn't want to include directory information if it exists?
 - resolution: use directory info in full file name if it exists.

- 5.2.2 File Type

- archives defer to next version. leave as other for now file name will give info in most cases. concerns?
- resolution: archives will be added as a valid options. This field is optional. If present, current options are:
 - source: source file
- binary: executable file, images will be considered as binaries for now as well.
- archive: file of other files (note this permits summarizing packages of packages)
 - other: does not fit into one of the above categories.

Al Kate: These definitions need to be added to Section 6.

- 5.2.3 License(s)

- aligned with 3.2.6 now any concerns?
- resolution: this field will follow syntax of 3.2.6. Valid values will be either:
 - short form license reference (per Appendix I)
- reference to license in section 4 (note: full text is present in section 4 must be exact)
- unknown can't tell if a license present or not (example: binary file)
- none no license detected in file source itself (may be higher level COPYING, but nothing in file itself)

- 5.2.4 Copyrights at file level

- do we want "none" vs. "none found"?
- reproduce all copyrights found in syntax ok?
- resolution: freeform text field, and "unknown" if no copyright detected.

- 5.2.6 Package(s) (optional)

- do we want this in v1 if so need it filled in (purpose, intent tag, dataformat, example. Kim?
 - resolution: drop from version 1

- 5.2.7 Ha**sh on File** (optional)

- SHA-1 to be used
- who owns writeup in text?
- resolution: Kate will update in next draft. This **needs to m**atch what's occuring at analysis level.

6 Definitions

- needs a pass through document highlighting terms and adding to area to be filled in. volunteers?
- Al: Mark will take a pass **through and** add into WI**KI all terms** he see that need definition in next
 - draft. Ownership of filling in definitions will occur in next meeting.

Appendix I

- create table with approved licenses, and then full text into document.
- Al: Kate to put in next draft based on info from maillist.

Appendix II

- examples which do we want to choose to illustrate spec?
- who drives? no owner drop?
- AI: Phil O. will lead discussion of candidates **to be** considered to be used at next meeting

Appendix III

- Rockett put the terms up, please review all
- Al: all please respond to mail list if issues.

From 6/17 meeting, here is the status of the action items:

Al: Rockett will work with Karen to get SPDX 1.0 **on agen**da for legal counsel meeting.

- pending

Al: All - review license text and intent fields **and** provide feedback at next meeting.

- pending.

Al: Rockett to revisit 3.2.6 intent field description.

- pending.

Al: Rockett/Bradley - boilerplate disclaimer

- Rockett - expects to be talking to Bradley - will follow up.

Al: Kate to update Standard License Short Form list with input from call and mail list, include with next draft version for Appendix 1.

- pending.

Al: Kate to summarize all current fields in table for 6/18

- done.

Al: Bill to take fist pass at proposal for RDF tags.

- done. mailed out before meeting.

AI: Bill to mail out RDF syntax checker link

- done. http://www.w3.org/RDF/Validator/

Al: Gary to look at pretty print of RDF in 6 month window (ie. not August, but after).

- pending.

Al: Michael H to take pass at text in WIKI to **describe X**ML approach and encoding used.

(1.3.5, 1.5.5, etc.) - need text on decision to use XML approach

AI: Michael H to ping Phillipe for details on **issue with** filepath when using UTF-8. UTF-8 is still best choice for 1.5.4.

- pending.

Al: Kate to ping Jack for outlook on update **to 2**.2.1.1 language to describe Major/Minor

- Jack confirmed he'll update (6/24)

Al: Kate to ping Bradley K if he has proposal **on R**eview field (2.2.5), Rockett to follow up.

- pending.

Al: Michael H. to make proposal if download **URL** is blank or not applicable (3.2.3)

- pending.

Thanks again to all who participated in the extra meeting today, it is making it possible

for us to close this definition in time to line up with the LinuxCon initiative. :)

Corrections/feedback/suggestions - please post the mail list.

Kate
