

Software Package Data Exchange (SPDX™) Specification

Version: 1.0 beta - DRAFT 20100807

DISCLAIMER

The following is a draft of the Software Package Data eXchange (SDPX) Specification. This draft is provided as a public courtesy to illustrate the progress of the project. Please be advised that in addition to the licensing terms recited below, no reliance should be made regarding this draft, including any reliance that this draft represents any particular standard for any particular purpose. When the official SPDX specification is released, it will be clearly be labeled "official", and its purpose and recommended use will be clearly stated at that time.

APPENDIX III. CREATIVE COMMONS ATTRIBUTION LICENSE 3.0	35

1. Rationale

1.1 Charter

To create a set of data exchange standards that enable companies and organizations to share + and component information (metadata) for software packages and related content with the aim of facilitating license and other policy compliance.

1.2 Definition

The Software Package Data Exchange (SPDX™) specification is a standard format for communicating the components, licenses and copyrights associated with a software package. An SPDX file is associated with a particular software package and contains information about that package in the SPDX format.

1.3. Why is a common format for data exchange needed?

Companies and organizations (collectively “Organizations”) are widely using and reusing open source and other software packages. Compliance with the associated licenses requires a set of analysis activities and due diligence that each Organization performs independently including: a manual and/or automated scan of software and identification of associated licenses followed by manual verification. Software development teams across the globe use the same open source packages, but little infrastructure exists to facilitate collaboration on the analysis or share the results of these analysis activities. As a result, many groups are performing the same work leading to duplicated efforts and redundant information being created. The SPDX working group seeks to create a data exchange format so that information about software packages and related content, may be collected and shared in a common format with the goal of saving time and improving data accuracy.

1.4. What does this specification cover?

1.4.1. Identification Information: Meta data to associate analysis results with a specific package. This includes a unique identifier that identifies a specific instance of a package and permits correlation to the corresponding SPDX file.

1.4.2. Overview Information: Facts that are common properties of the entire package.

1.4.3. File Specific Information: Facts (e.g. copyrights, licenses) that are specific to each file included in the package.

1.4.4. Common Licenses: A list of common licenses likely to be encountered and a standardized naming convention for referring to these licenses within an SPDX document. This naming convention will also be the basis for extending this set of common licenses over time.

1.4.5. Evolution Hooks: A set of mechanisms that permit extending the specification in a structured manner under specific future versions of the specification.

1.5. What is not covered in the specification?

1.5.1. Information that cannot be derived from an inspection (whether manual or using automated tools) of the package to be analyzed.

1.5.2. How the data stored in and SPDX file is used by the recipient.

1.5.3. Any identification of any patent(s) which may or may not relate to the package.

1.5.4. Legal interpretation of the licenses or any compliance actions that might need to be taken.

1.6. Format Requirements:

1.6.1. Must be in a human readable form.

1.6.2. Must be in a syntax that a software tool can read and write.

1.6.3. Must be suitable to be checked for syntactic correctness independent of how it was generated (human or tool).

1.6.4. The SPDX file character set must support UTF-8 encoding.

1.6.5. Must permit automated specification syntax validation.

1.6.6. Resource Description Framework (RDF) will be used to represent certain semantic information.

2. Identification Information

One instance of the Identification Information is required per package instance.

Fields:

2.1 SPDX Specification Version Number

- 2.1.1 **Purpose:** Provide a reference number that can be used to understand how to parse and interpret the rest of the file. It will enable both future changes to the specification and to support backward compatibility. The version number consists of a Major and Minor version indicator. The Major field will be incremented when one or more sections are created, modified or deleted. The Minor field will be incremented when either only the fields within a section are modified or standard recognized licenses are added to appendix.
- 2.1.2 **Intent:** Here, parties exchanging Identification Information in accordance with SPDX specification need to provide 100% transparency as to which SPDX specification such Identification Information is conforming to.
- 2.1.3 **Cardinality:** Mandatory, single instance
- 2.1.4 **Tag:** SPDXVersion
- 2.1.5 **RDF:** /RDF/SPDXDoc/SPDXVersion
- 2.1.6 **Data Format:** SPDX-M.N **where:** M is Major version number, N is minor version number.
- 2.1.7 **Example:** SPDXVersion: SPDX-1.0

2.2 Generation Method

- 2.2.1 **Purpose:** Identify how the meta data information in the SPDX file was generated. If it was generated manually, it should indicate – who did the analysis. If the information in the file was generated with a software tool, the file should indicate an identifier and version for that tool.
- 2.2.2 **Intent:** Here, the generation method will assist the reader of the Identification Information in self determining the general reliability/accuracy of the Identification Information.
- 2.2.3 **Cardinality:** Mandatory, one or more.
- 2.2.4 **Tag:** "CreatedBy"
- 2.2.5 **RDF:** /RDF/SPDXDoc/CreatedBy

2.2.6 **Data Format:** "Person: person name" (with optional email) or "Company: company" (depending on which is accountable) or "Tool: tool identifier - version". If multiple participants in the analysis, then they should be indicated with separate instances.

2.2.7 **Example:**

CreatedBy: Person: Jane Doe (jane.doe@company.com)
CreatedBy: Company: ExampleCodeInspect (contact@ECI.com)
CreatedBy: Tool: LicenseFind-1.0

2.3 Creation Time Stamp

2.3.1 **Purpose:** Identify when the analysis was done and the SPDX file was originally created. This is to be specified according to combined data and time in UTC format as specified in ISO 8601 standard.

2.3.2 **Intent:** Here, the Time Stamp can serve as a verification as to whether the analysis needs to be updated.

2.3.3 **Cardinality:** Mandatory, single instance.

2.3.4 **Tag:** "Created:"

2.3.5 **RDF:** /RDF/SPDXDoc/Created

2.3.6 **Data Format:** YYYY-MM-DDThh:mm:ssZ where: YYYY is year, MM is month with leading zero, DD is day with leading zero, T is delimiter for time, hh is hours with leading zero in 24 hour time, mm is minutes with leading zero, ss is seconds with leading zero, and Z is universal time indicator.

2.3.7 **Example:** Created: 2010-01-29T18:30:22Z

2.4 Reviewers

2.4.1 **Purpose:** List of the people who have reviewed the SPDX file and the date of that review. Note that there is no requirement for a particular reviewer to add their name to the file, however it may be important for participants in the software supply chain to validate whether upstream providers have reviewed the SPDX file. This can be considered as an equivalent to "signed off" or "reviewed by". Additional reviewers can be added after the original version of the SPDX file is created and can occur as an append to the original file.

2.4.2 **Intent:** Here, as time progresses certain reviewers will begin to gain credibility as reliable. This field intends to make such information transparent.

2.4.3 **Cardinality:** Optional, zero to many.

2.4.4 **Tag:** "ReviewedBy:"

2.4.5 **RDF:** /RDF/SPDXDoc/ReviewedBy

- 2.4.6 **Data Format:** "Person: person name (with optional email) YYYY-MM-DDThh:mm:ssZ". Where YYYY is year, MM is month with leading zero, DD is day with leading zero, T is delimiter for time, hh is hours with leading zero in 24 hour time, mm is minutes with leading zero, ss is seconds with leading zero, and Z is universal time indicator. If multiple people participated in the analysis, then each should be represented with separate instances.
- 2.4.7 **Example:** ReviewedBy: Person: Jane Doe (jane@company.com) 2010-08-01T14:30:00Z

3. Common Overview Information

One instance of the Common Overview Information is required per package being analyzed. A package can contain sub-packages, but the overview is a reference to the entire contents of the package listed.

Fields:

3.1 Formal Name

- 3.1.1 **Purpose:** Full name of the package as given by originator with version information if available.
- 3.1.2 **Intent:** Here, the formal name of each package is an important conventional technical identifier to be maintained for each package.
- 3.1.3 **Cardinality:** Mandatory single instance.
- 3.1.4 **Tag:** "DeclaredName:"
- 3.1.5 **RDF:** /RDF/SPDXDoc/Describes/Package/DeclaredName
- 3.1.6 **DataFormat:** text string of full name and version information if available.
- 3.1.7 **Example:** DeclaredName: glibc 2.11.1

3.2 Specific Package File Name

- 3.2.1 **Purpose:** File name of package instance.
- 3.2.2 **Intent:** Here, the actual filename of the compressed file (containing the package) is a significant technical element that needs to be carried with each package's Identification Information.
- 3.2.3 **Cardinality:** Mandatory single instance
- 3.2.4 **Tag:** MachineName:
- 3.2.5 **RDF:** /RDF/SPDXDoc/Describes/Package/MachineName
- 3.2.6 **Data Format:** text string of machine generated file name and version typically includes the packaging and compression methods used.
- 3.2.7 **Example:** MachineName: glibc-2.11.1.tar.gz

3.3 Unique Identifier

- 3.3.1 **Purpose:** This field provides an independently reproducible mechanism that permits unique identification of a specific package that correlates to the data in this SPDX file. This identifier enables a recipient to determine if any file in the original package has been changed. The SHA1 unique identifier mechanism will be used.
- 3.3.2 **Intent:** Here, by providing an unique identifier of each package, confusion over which version/modification of a specific package the Identification Information references should be eliminated.
- 3.3.3 **Cardinality:** Mandatory single instance
- 3.3.4 **Tag:** "SHA1"
- 3.3.5 **RDF:** /RDF/SPDXDoc/Describes/Package/SHA1
- 3.3.6 **Data Format:** 160 bit value represented as 40 hexadecimal digits.
- 3.3.7 **Example:** SHA1: d6a770ba38583ed4bb4525bd96e50461655d2758

3.4 Download URL

- 3.4.1 **Purpose:** This field identifies the download Universal Resource Locator (URL) for this package at the time that the SPDX file was initially created and the analysis was done. If there is no public URL, then it is explicitly marked as "unknown".
- 3.4.2 **Intent:** Here, where to download the exact package being referenced is a critical verification and tracking datum.
- 3.4.3 **Cardinality:** Mandatory single instance
- 3.4.4 **Tag:** URL:
- 3.4.5 **RDF:** [/RDF/SPDXDoc/Describes/Package/URL/@rdf:resource](#)
- 3.4.6 **Data Format:** uniform resource locator (when the URL is explicitly "unknown" use <http://spdx.org/rdf/unknown>)
- 3.4.7 **Example:** URL: <http://ftp.gnu.org/gnu/glibc/>

3.5 Additional Source Information

- 3.5.1 **Purpose:** This is a free form text field that contains additional comments about the origin of the package. For instance, this field might include comments indicating whether the package been pulled from a source code management system or has been repackaged.

- 3.5.2 **Intent:** Here, by providing a freeform field, reviewers can provide any additional information to describe any anomalies, or discoveries, in the determination of the origin of the package.
- 3.5.3 **Cardinality:** Optional single instance
- 3.5.4 **Tag:** "SourceInfo:"
- 3.5.5 **RDF:** /RDF/SPDXDoc/Describes/Package/SourceInfo
- 3.5.6 **Data Format:** free form text without line separator
- 3.5.7 **Example:**
- SourceInfo: uses glibc-2_11-branch from git://sourceware.org/git/glibc.git.

3.6 Declared License(s) for a Package

- 3.6.1 **Purpose:** This field lists the licenses that have been declared by the creators of the package. The licenses are listed using a standard short form name. See Appendix I for standardized license short forms. If a Declared License is not one of the standardized license short forms, this field must contain a reference to the full license text included in this SPDX file. If no license is declared, the "NotSpecified" short form in Appendix I should be used. If it is unclear if there is a license reference or not, use "Unknown" short form from Appendix I. If more than one license is formally declared for package, then each should be listed. If the creators of the package offer the recipient a choice of licenses, then each of the choices will be declared as a "disjunctive" license.
- 3.6.2 **Intent:** This is simply the license identified in text in the actual package source code files (typically in the header of each package file.) This field may have multiple declared licenses, if multiple licenses are declared at the package level.
- 3.6.3 **Cardinality:** Mandatory, one or multiple.
- 3.6.4 **Tag:** "DeclaredLicense:"
["DeclaredLicense/DisjunctiveLicense:"]
- 3.6.5 **RDF:**
- /RDF/SPDXDoc/Describes/Package/DeclaredLicense
/RDF/SPDXDoc/Describes/Package/DeclaredLicense/DisjunctiveLicense
- 3.6.6 **Data Format:** <short form identifier in Appendix I> | "FullLicense"-N
- 3.6.7 **Example:** DeclaredLicense: LGPL-2.0

3.7 Detected License(s) in Package

- 3.7.1 **Purpose:** This field list of all licenses found in the package by scanning the files, manually or using automated tools. The licenses should use the standard short form names. See Appendix I for standardized license short forms. If a Detected License is not one of the standardized license short forms, this field must contain a reference to the full licenses text included in this SPDX file. If no licenses are detected then the "NotSpecified" short form in Appendix I should be used. If it is unclear if there is a license reference or not, use "Unknown" short form from Appendix I.
- 3.7.2 **Intent:** Here, we intend to capture all licenses within the package detected by any scanning tools used by the package reviewer.
- 3.7.3 **Cardinality:** Mandatory, one or multiple.
- 3.7.4 **Tag:** "DetectedLicense:"
- 3.7.5 **RDF:** /RDF/SPDXDoc/Describes/Package/DetectedLicense/
- 3.7.6 **Data Format:** <short form identifier in Appendix I> | "FullLicense"-N
- 3.7.7 **Example:**
- DetectedLicense: GPL-2.0
DetectedLicense: FullLicense-1
DetectedLicense: FullLicense-2

3.8 Declared Copyright Holder of Package

- 3.8.1 **Purpose:** Identify the author(s) and licensor(s) of package, as well as any dates present. This will be a free form text field extracted from the package information files.
- 3.8.2 **Intent:** Here, by identifying the actual author(s), some ambiguities, e.g., under which license the author(s) were intending to license the package, may be resolvable by knowing who to contact for clarity.
- 3.8.3 **Cardinality:** Mandatory, single instance
- 3.8.4 **Tag:** "DeclaredCopyright:"
- 3.8.5 **RDF:** /RDF/SPDXDoc/Describes/Package/DeclaredCopyright
- 3.8.6 **Data Format:** free form text | "unknown"
- 3.8.7 **Example:** DeclaredCopyright: Copyright 2008-2010 John Smith

3.9 Short Description

- 3.9.1 **Purpose:** This field is a short description of the package
- 3.9.2 **Intent:** Here, the intent is to allow a reader/reviewer of this field to quickly understand the function/use of the package, at a high level, without having to parse the source code of the actual package.
- 3.9.3 **Cardinality:** Optional single instance
- 3.9.4 **Tag:** "ShortDesc:"
- 3.9.5 **RDF:** /RDF/SPDXDoc/Describes/Package/ShortDesc
- 3.9.6 **Data Format:** free form text that can span multiple lines
- 3.9.7 **Example:** ShortDesc: gnu c library

3.10 Description

- 3.10.1 **Purpose:** This field is a more detailed description of the package. It may be extracted from the packages itself.
- 3.10.2 **Intent:** Here, the intent is to provide technical readers/reviewers with a detailed technical explanation of the functionality, anticipated use, and anticipated implementation of the package. This field may also include a description of improvements over prior version of the package, where applicable.
- 3.10.3 **Cardinality:** Optional single instance
- 3.10.4 **Tag:** "Description:"
- 3.10.5 **RDF:** /RDF/SPDXDoc/Describes/Package/Description
- 3.10.6 **Data Format:** free form text than can span multiple lines.
- 3.10.7 **Example:** Description:

4. Index of Non Standard License(s) Detected

This section is used for any detected or declared licenses that are NOT one of the standard licenses. One instance should be created for every unique license detected in package that does not match one of the standard license short forms from Appendix I. Each license instance should have the following fields.

Fields:

4.1 Identifier

- 4.1.1 **Purpose:** Provide a unique identifier for the packages and files sections to refer to non standard license text detected in the package and reproduced here to aid analysis.
- 4.1.2 **Intent:** Here, we seek to identify in whole or in part portions of the package which are licensed under unfamiliar and/or uncommon licenses.
- 4.1.3 **Cardinality:** mandatory single instance
- 4.1.4 **Tag:** "LicenseID"
- 4.1.5 **RDF:** /RDF/SPDXDoc/Describes/License/LicenseID
- 4.1.6 **Data Format:** "FullLicense-"N where N is a unique ascending numeric value.
- 4.1.7 **Example:** LicenseID: FullLicense-1

4.2 Extracted Text

- 4.2.1 **Purpose:** Provide a copy of the actual text of the license extracted from the package that is associated with the License ID to aid in analysis.
- 4.2.2 **Intent:** Here, the actual license text included in the package serves as confirmation that the license, and version, named in the header files of the package is correct.
- 4.2.3 **Cardinality:** Mandatory single instance
- 4.2.4 **Tag:** "LicenseText:"
- 4.2.5 **RDF:** /RDF/SPDXDoc/Describes/License/LicenseText
- 4.2.6 **Data Format:** free form text field that may span multiple lines.
- 4.2.7 **Example:** LicenseText:

The following is a draft of the Software Package Data eXchange (SDPX) Specification. This draft is provided as a public courtesy to illustrate the progress of the project. Please be advised that in addition to the licensing terms recited below, no reliance should be made regarding this draft, including any reliance that this draft represents any particular standard for any particular purpose. When the official SPDX specification is released, it will be clearly be labeled "official", and its purpose and recommended use will be clearly stated at that time.

5. File Specific Information

This section is used to list information for the files in the package. One instance should be created for each file. Each file instance should have the following fields.

Fields:

5.1 Full File Name

- 5.1.1 **Purpose:** Identify path to file that corresponds to this information.
- 5.1.2 **Intent:** Here, any confusion over where a file needs to hierarchically be placed for proper functionality is mitigated.
- 5.1.3 **Cardinality:** Mandatory single instance
- 5.1.4 **Tag:** "Name"
- 5.1.5 **RDF:** /RDF/SPDXDoc/Describes/File/Name
- 5.1.6 **Data Format:** [directory/]filename.suffix
- 5.1.7 **Example:** Name: /bar/foo.c

5.2 File Type

- 5.2.1 **Purpose:** This field Identifies common types of files where there may be different treatment of copyright and license information: source, binary, machine generated, etc.
- 5.2.2 **Intent:** Here, this field is basically the "best available" format field, from a developer perspective.
- 5.2.3 **Cardinality:** Optional single instance
- 5.2.4 **Tag:** "Type:"
- 5.2.5 **RDF:** /RDF/SPDXDoc/Describes/File/Type
- 5.2.6 **Data Format:** "source" | "binary" | "archive" | "other"
- 5.2.7 **Example:** Type: binary

5.3 License(s)

5.3.1 **Purpose:** This field contains the license governing the file if it is known. It will either be explicit from the file header or other information found in the file's source code or the default from the package. If no license information is found it should be denoted as "NotSpecified". If no license information can be determined, the license is denoted as "Unknown". The licenses should use the standard short form names. See Appendix I for standardized license short forms. If a Detected License is not one of the standardized license short forms, this field must contain a reference to the full licenses text included in this SPDX file in section 4. If more than one license is detected in the file, then each should be listed. If any of the detected licenses offer the recipient a choice of licenses, then each of the choices will be declared as a "disjunctive" license.

5.3.2 **Intent:** Here, the intent is to have a uniform method to refer to each license with specificity to eliminate any license confusion. For example, the 3 clause BSD would have a different license identifier than the 4 clause BSD.

5.3.3 **Cardinality:** Mandatory, one or many.

5.3.4 **Tag:** "License:"
["License/DisjunctiveLicense:"]

5.3.5 **RDF:**

/RDF/SPDXDoc/Describes/File/License
/RDF/SPDXDoc/Describes/File/License/DisjunctiveLicense

5.3.6 **Data Format:** <short form identifier in Appendix I> | "FullLicense"-N

5.3.7 **Example:**
License: GPL-2.0
License: FullLicense-2

5.4 Copyright Information Detected

5.4.1 **Purpose:** This field identifies the copyright holders and associated dates of their copyright that are in this specific file if known. Note: Copyright holder identifier may have developer names, companies, email addresses, and may be specified in international character sets. This will be a freeform text field extracted from the package information files.

5.4.2 **Intent:** Here, similar to identifying the actual author(s) (above), by identifying the copyright holder(s), the copyright holder(s) may be contacted if licensing issues exist with the package, or to request distribution under another license more compatible with a given implementation, for example.

5.4.3 **Cardinality:** Mandatory, single instance

5.4.4 **Tag:** "Copyright:"

5.4.5 **RDF:** /RDF/SPDXDoc/Describes/File/Copyright

5.4.6 **Data Format:** free form text | "unknown"

5.4.7 **Example:** Copyright: Copyright 2008-2010 John Smith

5.5 File Identifier

5.5.1 **Purpose:** Provide a unique identifier to match analysis information on specific files between packages.

5.5.2 **Intent:** Here, by providing an unique identifier of each file, confusion over which version/modification of a specific file the Identification Information references should be eliminated.

5.5.3 **Cardinality:** Optional, single instance

5.5.4 **Tag:** "SHA1"

5.5.5 **RDF:** /RDF/SPDXDoc/Describes/File/SHA1

5.5.6 **Data Format:** 160 bit value represented as 40 hexadecimal digits.

5.5.7 **Example:** SHA1: d6a770ba38583ed4bb4525bd96e50461655d2758

6. DEFINITIONS

Reserved in case there is a need for list of definitions of terms.

Appendix I. Standard License Short Forms

The following table contains the licenses with standardized short forms that should be recognized by programs that comply to this version of the specification. The short forms have been derived from common usage identifiers, followed by the version number when known. The identifier and version should be separated by a “-”.

Note: at this time, exact match, of the formal license is expected unless indicated otherwise by the template specifications in the version on the SPDX.org web site.

License Identifier	Recognized Exceptions	Full name of License

Appendix II. Examples

See: <http://spdx.org/examples>

Appendix III. Creative Commons Attribution License 3.0

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CREATIVE COMMONS PUBLIC LICENSE ("CCPL" OR "LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HERE, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. TO THE EXTENT THIS LICENSE MAY BE CONSIDERED TO BE A CONTRACT, THE LICENSOR GRANTS YOU THE RIGHTS CONTAINED HERE IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS.

1. Definitions

1. "Adaptation" means a work based upon the Work, or upon the Work and other pre-existing works, such as a translation, adaptation, derivative work, arrangement of music or other alterations of a literary or artistic work, or phonogram or performance and includes cinematographic adaptations or any other form in which the Work may be recast, transformed, or adapted including in any form recognizably derived from the original, except that a work that constitutes a Collection will not be considered an Adaptation for the purpose of this License. For the avoidance of doubt, where the Work is a musical work, performance or phonogram, the synchronization of the Work in timed-relation with a moving image ("synching") will be considered an Adaptation for the purpose of this License.
2. "Collection" means a collection of literary or artistic works, such as encyclopedias and anthologies, or performances, phonograms or broadcasts, or other works or subject matter other than works listed in Section 1(f) below, which, by reason of the selection and arrangement of their contents, constitute intellectual creations, in which the Work is included in its entirety in unmodified form along with one or more other contributions, each constituting separate and independent works in themselves, which together are assembled into a collective whole. A work that constitutes a Collection will not be considered an Adaptation (as defined above) for the purposes of this License.
3. "Distribute" means to make available to the public the original and copies of the Work or Adaptation, as appropriate, through sale or other transfer of ownership.
4. "Licensor" means the individual, individuals, entity or entities that offer(s) the Work under the terms of this License.
5. "Original Author" means, in the case of a literary or artistic work, the individual, individuals, entity or entities who created the Work or if no individual or entity can be identified, the publisher; and in addition (i) in the case of a performance the actors, singers, musicians, dancers, and other persons who act, sing, deliver, declaim, play in, interpret or otherwise perform literary or artistic works or expressions of folklore; (ii) in the case of a phonogram the producer being the person or legal entity who first fixes the sounds of a performance or other sounds; and, (iii) in the case of broadcasts, the organization that transmits the broadcast.
6. "Work" means the literary and/or artistic work offered under the terms of this License including without limitation any production in the literary, scientific and artistic domain, whatever may be the mode or form of its expression including digital form, such as a book, pamphlet and other writing; a lecture, address, sermon or other work of the same nature; a dramatic or dramatico-musical work; a choreographic work or entertainment in dumb show; a musical composition with or without words; a cinematographic work to which are assimilated works expressed by a process analogous to cinematography; a work of drawing, painting, architecture, sculpture, engraving or lithography; a photographic work to which are assimilated works expressed by a process analogous to photography; a work of applied art; an illustration, map, plan, sketch or three-dimensional work

relative to geography, topography, architecture or science; a performance; a broadcast; a phonogram; a compilation of data to the extent it is protected as a copyrightable work; or a work performed by a variety or circus performer to the extent it is not otherwise considered a literary or artistic work.

7. "You" means an individual or entity exercising rights under this License who has not previously violated the terms of this License with respect to the Work, or who has received express permission from the Licensor to exercise rights under this License despite a previous violation.
8. "Publicly Perform" means to perform public recitations of the Work and to communicate to the public those public recitations, by any means or process, including by wire or wireless means or public digital performances; to make available to the public Works in such a way that members of the public may access these Works from a place and at a place individually chosen by them; to perform the Work to the public by any means or process and the communication to the public of the performances of the Work, including by public digital performance; to broadcast and rebroadcast the Work by any means including signs, sounds or images.
9. "Reproduce" means to make copies of the Work by any means including without limitation by sound or visual recordings and the right of fixation and reproducing fixations of the Work, including storage of a protected performance or phonogram in digital form or other electronic medium.

2. Fair Dealing Rights. Nothing in this License is intended to reduce, limit, or restrict any uses free from copyright or rights arising from limitations or exceptions that are provided for in connection with the copyright protection under copyright law or other applicable laws.

3. License Grant. Subject to the terms and conditions of this License, Licensor hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:

1. to Reproduce the Work, to incorporate the Work into one or more Collections, and to Reproduce the Work as incorporated in the Collections;
2. to create and Reproduce Adaptations provided that any such Adaptation, including any translation in any medium, takes reasonable steps to clearly label, demarcate or otherwise identify that changes were made to the original Work. For example, a translation could be marked "The original work was translated from English to Spanish," or a modification could indicate "The original work has been modified.";
3. to Distribute and Publicly Perform the Work including as incorporated in Collections; and,
4. to Distribute and Publicly Perform Adaptations.
- 5.

For the avoidance of doubt:

1. Non-waivable Compulsory License Schemes. In those jurisdictions in which the right to collect royalties through any statutory or compulsory licensing scheme cannot be waived, the Licensor reserves the exclusive right to collect such royalties for any exercise by You of the rights granted under this License;
2. Waivable Compulsory License Schemes. In those jurisdictions in which the right to collect royalties through any statutory or compulsory licensing scheme can be waived, the Licensor waives the exclusive right to collect such royalties for any exercise by You of the rights granted under this License; and,
3. Voluntary License Schemes. The Licensor waives the right to collect royalties, whether individually or, in the event that the Licensor is a member of a collecting society that administers voluntary licensing schemes, via that society, from any exercise by You of the rights granted under this License.

The above rights may be exercised in all media and formats whether now known or hereafter devised. The above rights include the right to make such modifications as are technically necessary to exercise the rights in other media and formats. Subject to Section 8(f), all rights not expressly granted by Licensor are hereby reserved.

4. Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:

1. You may Distribute or Publicly Perform the Work only under the terms of this License. You must include a copy of, or the Uniform Resource Identifier (URI) for, this License with every copy of the Work You Distribute or Publicly Perform. You may not offer or impose any terms on the Work that restrict the terms of this License or the ability of the recipient of the Work to exercise the rights granted to that recipient under the terms of the License. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties with every copy of the Work You Distribute or Publicly Perform. When You Distribute or Publicly Perform the Work, You may not impose any effective technological measures on the Work that restrict the ability of a recipient of the Work from You to exercise the rights granted to that recipient under the terms of the License. This Section 4(a) applies to the Work as incorporated in a Collection, but this does not require the Collection apart from the Work itself to be made subject to the terms of this License. If You create a Collection, upon notice from any Licensor You must, to the extent practicable, remove from the Collection any credit as required by Section 4(b), as requested. If You create an Adaptation, upon notice from any Licensor You must, to the extent practicable, remove from the Adaptation any credit as required by Section 4(b), as requested.
2. If You Distribute, or Publicly Perform the Work or any Adaptations or Collections, You must, unless a request has been made pursuant to Section 4(a), keep intact all copyright notices for the Work and provide, reasonable to the medium or means You are utilizing: (i) the name of the Original Author (or pseudonym, if applicable) if supplied, and/or if the Original Author and/or Licensor designate another party or parties (e.g., a sponsor institute, publishing entity, journal) for attribution ("Attribution Parties") in Licensor's copyright notice, terms of service or by other reasonable means, the name of such party or parties; (ii) the title of the Work if supplied; (iii) to the extent reasonably practicable, the URI, if any, that Licensor specifies to be associated with the Work, unless such URI does not refer to the copyright notice or licensing information for the Work; and (iv) , consistent with Section 3(b), in the case of an Adaptation, a credit identifying the use of the Work in the Adaptation (e.g., "French translation of the Work by Original Author," or "Screenplay based on original Work by Original Author"). The credit required by this Section 4 (b) may be implemented in any reasonable manner; provided, however, that in the case of a Adaptation or Collection, at a minimum such credit will appear, if a credit for all contributing authors of the Adaptation or Collection appears, then as part of these credits and in a manner at least as prominent as the credits for the other contributing authors. For the avoidance of doubt, You may only use the credit required by this Section for the purpose of attribution in the manner set out above and, by exercising Your rights under this License, You may not implicitly or explicitly assert or imply any connection with, sponsorship or endorsement by the Original Author, Licensor and/or Attribution Parties, as appropriate, of You or Your use of the Work, without the separate, express prior written permission of the Original Author, Licensor and/or Attribution Parties.
3. Except as otherwise agreed in writing by the Licensor or as may be otherwise permitted by applicable law, if You Reproduce, Distribute or Publicly Perform the Work either by itself or as part of any Adaptations or Collections, You must not distort, mutilate, modify or take other derogatory action in relation to the Work which would be prejudicial to the Original Author's honor or reputation. Licensor agrees that in those jurisdictions (e.g. Japan), in which any exercise of the right granted in Section 3(b) of this License (the right to make Adaptations) would be deemed to be a distortion, mutilation, modification or other derogatory action prejudicial to the Original Author's honor and reputation, the Licensor will waive or not assert, as appropriate, this Section, to the fullest extent

permitted by the applicable national law, to enable You to reasonably exercise Your right under Section 3(b) of this License (right to make Adaptations) but not otherwise.

5. Representations, Warranties and Disclaimer

UNLESS OTHERWISE MUTUALLY AGREED TO BY THE PARTIES IN WRITING, LICENSOR OFFERS THE WORK AS-IS AND MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND CONCERNING THE WORK, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF TITLE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NONINFRINGEMENT, OR THE ABSENCE OF LATENT OR OTHER DEFECTS, ACCURACY, OR THE CARDINALITY OF ABSENCE OF ERRORS, WHETHER OR NOT DISCOVERABLE. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES, SO SUCH EXCLUSION MAY NOT APPLY TO YOU.

6. Limitation on Liability.

EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL LICENSOR BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK, EVEN IF LICENSOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. Termination

1. This License and the rights granted hereunder will terminate automatically upon any breach by You of the terms of this License. Individuals or entities who have received Adaptations or Collections from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 5, 6, 7, and 8 will survive any termination of this License.
2. Subject to the above terms and conditions, the license granted here is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, Licensor reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

8. Miscellaneous

1. Each time You Distribute or Publicly Perform the Work or a Collection, the Licensor offers to the recipient a license to the Work on the same terms and conditions as the license granted to You under this License.
2. Each time You Distribute or Publicly Perform an Adaptation, Licensor offers to the recipient a license to the original Work on the same terms and conditions as the license granted to You under this License.
3. If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this agreement, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.
4. No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.
5. This License constitutes the entire agreement between the parties with respect to the Work licensed here. There are no understandings, agreements or representations with respect to the

Work not specified here. Licensor shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Licensor and You.

6. The rights granted under, and the subject matter referenced, in this License were drafted utilizing the terminology of the Berne Convention for the Protection of Literary and Artistic Works (as amended on September 28, 1979), the Rome Convention of 1961, the WIPO Copyright Treaty of 1996, the WIPO Performances and Phonograms Treaty of 1996 and the Universal Copyright Convention (as revised on July 24, 1971). These rights and subject matter take effect in the relevant jurisdiction in which the License terms are sought to be enforced according to the corresponding provisions of the implementation of those treaty provisions in the applicable national law. If the standard suite of rights granted under applicable copyright law includes additional rights not granted under this License, such additional rights are deemed to be included in the License; this License is not intended to restrict the license of any rights under applicable law.
